

**Never Risk Losing Your Master Keys or Access Cards Again**

## Digital Tethering Solution & Accessories

In the U.S. today, nearly 15 million master key sets are in use with millions spent annually on key rings and cabinet systems to account for keys before and after a shift.

### Tether Technologies Gravity Digital Tethering Solution

Gravity closes the risk gap in current access control solutions utilized by security, janitorial and engineering employees.

Gravity is the only industrial-grade, digital tethering device that eliminates human error from master key loss.

### Tether Technologies Gravity Un-Pairing Station

The un-pairing station allows you to store the key unit only while the belt unit powers off, so as not to take up space in the cabinet.

### Tether Technologies Gravity Belt Clip

Replacement clips are not needed for Gravity purchases, as each Gravity unit comes with our three Standard Clip options.
